### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sarah Smith on March 21, 2007.

The application has been amended as follows:

In claim 2, line 2, delete -- "L shaped". -- and insert -- L-shaped. --.

In claim 4, line 2, after "said one end," delete -- (33a) and insert -- (22a) --.

In claim 5, line 2, delete -- , such as ceramic balls , or metallic balls --.

In claim 6, line 2, after "are covered by a", delete -- suitable --.

In claim 10, line 1, after "claim 8", delete -- characterized in that it also comprises -- and insert -- , further comprising --.

Add claim 17 as follows: --17. Reactor according to claim 5, wherein the inert balls are ceramic balls or metallic balls. --.

The following is an examiner's statement of reasons for allowance: horizontal reactors for the heterogeneous exothermic synthesis such as methanol synthesis are well known in the art. Examples are Noe, USP 4,696,799 and Zardi et al., WO 95/24961. It is also well known that particles in catalyst beds are supported by grids and screens to prevent catalyst leakage from the catalyst bed (See, for example, Noe, USP 4,696,799). However a catalyst sealing means comprising a support element fixed to

a reactor chamber wall below the lower gas permeable wall, a connecting element fixed at one end to the support element at an intermediate portion of a side end of the gas permeable wall, a plurality of filling elements arranged between the side end of the lower gas-permeable wall and an inner wall of the reactor wall and supported by a connecting element at a portion protruding from the intermediate element portion toward the inner wall of the reactor chamber which provides a means to prevent catalyst particle leakage from catalyst beds under different operating temperatures are not disclosed or suggested by the prior art cited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
